2. Candidates must **not turn this page** until the invigilator tells them to do so.

QUESTION ONE

a) Describe the seven unique features of E-commerce Technology . Explain how any Four (4) of these features create value for businesses or consumers. **[7Marks]**

b) Mobile computing provides the technological foundation for mobile commerce.

(i)Explain what mobile computing is and outline its key characteristics. **[5 Marks]**

(ii) Discuss three (3) advantages and three (3) limitations of mobile commerce that arise from mobile computing . **[6 Marks]**

C) Critically discuss the benefits of e-commerce from the perspectives of

(i) organizations and

(ii) consumers.

In your answer, explain at least two benefits for each group, and analyze how e-commerce contributes to improved operational efficiency, enhanced consumer convenience, and expanded market access. **[7 Marks]**

QUESTION TWO

Electronic commerce exposes both consumers and merchants to various risks similar to those found in physical marketplaces. Ensuring good e-commerce security is therefore critical for the success of online transactions.

Required:

a) Define good e-commerce security. Then explain, with examples, why online transactions are vulnerable to (i) loss of privacy and (ii) fraud. **[8 Marks]**

b) Discuss the risks faced by consumers and merchants in e-commerce transactions, using examples to illustrate how these risks compare to those in a physical marketplace. **[7 Marks]**

C) Explain how a high level of e- commerce security can be achieved by considering the following factors:

i. Use of new technologies

ii. Organizational policies and procedures

iii. Industry standards and government

iv. The concept that security often breaks at the weakest link **[10 marks]**

QUESTION THREE

Online payment systems play a critical role in enabling electronic commerce by providing secure and efficient methods for transferring value over the Internet.

a) Explain cash as a payment system and discuss its advantages and disadvantages.

Then, describe stored value payment systems, giving examples and highlighting how they differ from cash in terms of usage and limitations. **[8 marks]**

b)Describe the card payment systems used in e-commerce.

Your answer should include:

- Credit cards
- Debit cards
- Smart cards

Briefly explain how online **credit card** transactions are processed. **[7 Marks]**

C)Distinguish clearly between server-side electronic wallets and client-side electronic wallets.

In your answer, you should:

I. Define server-side e-wallets and client-side e-wallets

II. Explain how each type works

III. Discuss the advantages and disadvantages of each type

IV. Use relevant examples where appropriate . **[10 Marks]**

THE END
