QUESTION 1

Imagine you have got two childhood friends, Jane and Mark. Jane is a double orphan, her poor parents died in a horrifying car accident when she was only 12 years. Her uncle, who had financial challenges as well, took over the responsibility of raising her and taking her to schools. Despite all the care from her uncle and wanting to see he educated, Jane became a frustrated, depressed and a drunkard, taking after the kind of life that her parents lead. After her secondary education, she turned to drugs and other criminal activities. She was arrested by the police and eventually imprisoned.

On the other hand, Mark was coming from a well to do background, his parents were rich and both alive. When he was in college, his parents even gave him a personal to holder vehicle. Mark had challenges with his academics, whenever he wrote test or exam, he could score very low marks and, in most cases, failed. Eventually, mark started abusing drugs such as cocaine, heroin and marijuana. He was subsequently arrested and imprisoned.

Studying both scenarios above carefully, answer the following questions:

a) In your own understanding, explain the concept crime science. (5 marks)

b) Explain any two (2) reasons why punishment is necessary for offenders. (4 marks)

c) State and explain the theories that would support Jane's situation. (10 marks)

QUESTION 2

The Law provide a formal mechanism for the creation and maintenance of social order in complex societies. They define crime, whether a crime has been committed, whether a given person is guilty of the act, and the convicted offender's punishment. The level of "evilness" is the basis of crime. We can distinguish crimes from one another in terms of the length of punishment and place of confinement. This is called grading. Crimes are generally graded into three categories:

a) Felonies, (8 marks)

b) Misdemeanours (6 marks)

c) Infractions (6 marks)

With the use of two (2) examples in each case, discuss these types of crime

[Total: 20 marks]

QUESTION 3

a) IQ, short for intelligence quotient, was calculated as chronological age divided by mental age, which was then multiplied by 100, with the average score being 100.

$$IQ = \frac{\text{Mental age}}{\text{Chronological age}} \times 100$$

With the use of one example in each case, differentiate between mental age and chronological age. (6 marks)

b) In relation to IQ, discuss Alfred Binet and Herbert H. Goddard theories (8 marks)

c) According to J. Baptista della Porte, who concluded that specific characteristics, including small ears and bushy eyebrows, indicated certain criminal types. Do you support or disagree to this theory? Give reasons to support your answer. (6 marks)
